WATER CONTROL

Morris Group International's Water Control Divisions are focused on delivering water at the appropriate pressure and temperature for use in showers, sinks, appliances, and emergency safety equipment.

CHRONOMITE Since 1966

- Point-of-Use Non-Thermostatic Tankless Water Heaters
- Point-of-Use Thermostatic Tankless Water Heaters
- Point-of-Use Thermostatic Tankless Water Heaters with ASSE 1070 Mixing Valve
- Point-of-Use Mini Tank Water Heaters
- Single Phase Large Capacity Tankless Water Heaters
- Three Phase Large Capacity Tankless Water Heaters
- Electrical Accessories
- Flow Control

MGI CONTROLS

- Pressure Reducing Valves (PRV)
- Check Valves
- Master Mixing Valves (ASSE 1017)
- Emergency Tempering Valves (ASSE 1071)
- Lavatory Tempering Valves (ASSE 1070)
- Shower Mixing Valves (ASSE 1016)
- Thermostatic Balancing Valves (TMV)
- Supply Fixtures (TMV)
- Temperature Monitoring & Alarm (TMV)

SAFETY MANUFACTURING

- Eye Wash Stations
- Drench Hoses
- Safety Showers
- Combination Eye Wash/Shower Stations
- Accessories

MGI CONTROLS

MODEL NO.
Pressure Reducing Valves (PRV)

PRVs are capable of handling a uniquely high level of water pressure, eliminating the need to install multiple PRVs in a line, thereby minimizing failure points and installation time.

Discover how it works

CHRONOMITE® offers instantaneous tankless electric water heaters that provide an endless supply of hot water at the point of use. By heating water quickly and only when it is needed, Chronomite water heaters offer water and energy savings, resulting in lower maintenance and operational costs throughout a building.

PRODUCT CATEGORIES

- Point-of-Use Non-Thermostatic Tankless Water Heaters
- Point-of-Use Thermostatic Tankless Water Heaters
- Point-of-Use Thermostatic Tankless Water Heaters with ASSE 1070 Mixing Valve
- Point-of-Use Mini Tank Water Heater
- Single Phase Large Capacity Tankless Water Heaters

BOXER® WATER HEATER

ERB Series

COMPLIANTMIX®

WATER HEATER

CMI Series

MGI CONTROLS® offers Thermostatic Mixing Valves that contribute to the safety and comfort of building users by bringing water from showers and sinks to a safe temperature for use. MGI ConTrols also manufactures Pressure Reducing Valves that reduce the pressure from the incoming municipal line to a level that is safe for use in a commercial building.

PRODUCT CATEGORIES

- Pressure Reducing Valves (PRV)
- Check Valves
- Master Mixing Valves (ASSE 1017)
- Emergency Tempering Valves (ASSE 1071)
- Lavatory Tempering Valves (ASSE 1070)
- Shower Mixing Valves (ASSE 1016)
- Thermostatic Balancing Valves (TMV)
- Supply Fixtures (TMV)
- Temperature Monitoring & Alarm (TMV)

FIGURE NO. 3140

AcornVac® offers design freedom and future flexibility for all buildings with vacuum plumbing systems! AcornVac vacuum plumbing systems address many challenges associated with gravity plumbing systems, offering benefits in a variety of areas. These include eliminating floor cutting and the need to x-ray the slab to find a suitable place for waste piping, routing waste piping overhead and around obstacles, and eliminating the need for continuous slope on waste piping. In addition, vacuum plumbing can reduce labor and material costs and reduce water usage for toilets by up to 68%, leading to real savings in the cost of building construction and operating costs. AcornVac also contributes to flexibility in design by offering the ability to repurpose space and move plumbing fixtures quickly and easily.

PLUMBING FIXTURES AND ACCESS

Morris Group International's Plumbing Fixtures and Access divisions manufacture plumbing fixtures, accessories, and access doors for commercial, institutional, and healthcare markets.

- Acorn-Sinks® Commercial Stainless Steel Sinks
- Accessories (Division 10)
- Combination Toilet - Lavatories
